FAQ

Legacy

Welcome to my website!

I picked the ICT programme since I've always loved programming and tinkering with computers. I think it's the right choice for me, as I've wanted to become a software engineer for as long as I can remember. I'm looking forward to learning new things and meeting new people. I'm also excited to see what the future holds for me.

Study Choice

I chose this study programme because I've always had an affinity for programming, computers and technologies in general. I started learning how to code 10 years ago and I've been in love with it since then. I want to keep developing my skills and connect with like-minded people along the way. Besides, this is the field which I believe will always have something to improve and innovate.

Frequently Asked Questions

How can you print a document from your laptop at HZ?

You go to [print.hz.nl](#) and log in with your student credentials. You upload the document and select the print settings. After that, you go to the printer rooms and scan your card on a printer, which triggers the print job.

How can you scan a document and send it to your laptop at HZ?

You put a document in the scanner, scan your card and the document will be sent to your email.
