Constructive Feedback on how to improve

The design is pretty nice for the most part; however the currently active page on the navbar could be highlighted a bit better visually. Also, there is some more work to be done on the animations. Finally, some more content should be written and added. The HZ logo is missing.

Back-end coding and technical skills

Constructive Feedback on how to improve

Code looks pretty good, there is no SEO done whatsoever however.

Compliments:

- 3. Website is easy to navigate and understand.
 - 2. Animations look great.
 - 3. Colors are nice.

Improvements:

- 1. No SEO carelessness
- 2. No HZ logo carelessness
- 3. Navigation bar active page looks ugly carelessness
 - 4. Blog posts should be more interesting fallacy

Code Review Feedback:

I still need to work on the blog post pages, as well as the SEO. One thing that I have already improved is the blog post cards animations, since they were really bad and didn't even function properly.

Tasks:

- 1. Add HZ logo.
- 2. Fix navbar #active page.
- 3. Make blog post pages feel more like a part of the website
 - 4. Work on the SEO.
- 5. Add more content to the website and make it feel more complete
